**Content-Headline:** Make waiting more of a pleasure for your customers and visitors!

Offer your guests a centre of tranquillity that invites them to listen, work, do research or relax. In the sonic chair, your guests will feel undisturbed and yet still in the middle of things. At the same time, very little noise is emitted.

You can even offer your guests a special listening experience in a suite.

### Connecting your own devices

Your guest can listen to his own music or watch films without being disturbed. This merely involves connecting a laptop, mobile telephone, or iPad to play the content. We offer the version developed for this purpose with a laptop table ([> versions](#)) and integrated audio jacks in two sizes. Connecting these devices to the audio cable (3.5-mm TRS connector), which is also permanently installed and, thus, protected from theft, is also no problem.

**Content-Bild:**

### Multimedia Equipment

The theft-proof integration of an iPad or an iMac with touch screen ([> versions](#)) makes the sonic chair a multimedia chair that can, for example, be used as an Internet station. This can make waiting a pleasure!

## Individualisation

The sonic chair is not only available in various colours ([> colours](#)). You can also have it designed with your logo, your corporate design or according to other specifications ([> individualisation](#)). We will take your requirements into consideration and gladly provide advice. Contact ([> contact](#)) us.
